## • **CES 2024 Highlights** •

Tuesday, January 9th – Friday, January 12th

The annual Consumer Electronics Show (CES) in Las Vegas stands as one of the world's largest technology trade events. It serves as a platform for numerous exhibitors to unveil cutting-edge products, offering insights into emerging trends in the electronics industry. As we anticipate the 2024 show, Beyond Design is eager to spotlight some of our favorite picks from the myriad of offering.

## PHILIPS

### Wi-Fi Palm Recognition Smart Deadbolt

Philips unveils a smart lock with a built-in palm scanner, eliminating keys or codes. Unlocking the door with a unique palm print, it registers up to 50 vein patterns, ensuring inclusivity for hands of all ages.

### Foldable OLED monitor

Asus presented its first foldable OLED monitor, prioritizing portability without compromising comfort. Positioned as a flexible tool for mobile productivity, the ZenScreen Fold OLED monitor features a 17.3-inch screen, perfect for serving as a secondary display.

### Transparent OLED TV

LG unveiled the world's first 77-inch wireless transparent OLED TV at CES 2024, featuring 4K resolution and LG's wireless transmission technology for audio and video. The TV, with down-firing speakers in its base, offers standalone, against-the-wall, and wall-mounted options.

## WITHINGS

### BeamO

Withings enters at-home healthcare with BeamO, introduced at CES 2024. This compact device measures body temperature, blood oxygen saturation, and provides medical-grade ECG readings.

## SAMSUNG

### Ballie

Samsung's updated Ballie robot now includes projector functionality, capable of projecting onto various surfaces while navigating your home. This AI-equipped robot efficiently handles smart home tasks, answers phone calls, and attends to your pet's needs.

### AX Visio

The AX Visio 10x32 merges exceptional SWAROVISION quality with digital intelligence, offering AI-supported binoculars. With the touch of a button, the identification function assists in recognizing birds and various animal species.

### AI Cat door

Flappie, a Swiss start-up is showcasing an AI-powered cat door that automatically locks if your feline friend attempts to bring in prey from outside.

## L'ORÉAL

### AirLight Pro Hair Dryer

L'Oréal Group showcased a next-generation hair drying tool, AirLight Pro. It employs a blend of infrared-light technology and wind to nurture hair, resulting in visibly smoother and hydrated hair. Additionally, it accelerates the drying process.

## WEHEAD

### WeHead GPT

An AI-powered robotic head with a sophisticated language model and screens mimicking AI-generated eyes and faces lets users experience the presence of a virtual human or a digital replica in the physical world.

## Physical keyboard

Clicks has introduced an iPhone case that evokes nostalgia, designed to provide a physical keyboard when needed. By pulling down the top section of the case and sliding your iPhone toward the USB-C/Lightning port, the keyboard seamlessly connects to your device.

## AirVision M1

The AirVision M1 consists of glasses housing a wearable display that projects content from a connected phone or computer. Featuring a 1080p Micro OLED display with a 57-degree vertical perspective field of view, it provides a substantial screen experience right in front of your eyes.

## GE Profile Smart Indoor Smoker

A kitchen countertop appliance allows indoor smoking without setting off alarms. Using Active Smoke Filtration technology, it incorporates a "catalyst system" to produce wood smoke from pellets and combines it with an electric heating element..

## XGIMI

### Aladdin Projector

The XGIMI Aladdin integrates a Smart Projector, surround sound speakers, and a ceiling lamp into one device. It projects a 100-inch screen from around 6 feet away with 1080p resolution, controlled by voice commands. It also includes interactive features such as dynamic wallpapers, interactive children's books, and ambient sounds.

## eureka®

### Dual Washer

The Eureka Dual Washing Bot, a 4-in-1 device, combines a washing machine, dryer, and dual robot vacuum and mop. This autonomous gadget, with a metallic blue exterior, provides self-cleaning convenience, prevents mold with self-rinsing and deodorizing, and features a built-in camera for remote home monitoring.

## ECOFLOW

### Delta Pro Ultra

This serves as the company's premier whole-home backup solution, boasting a robust 7,200W power capacity. The company asserts that the unit is capable of efficiently powering a three-ton central air unit. Additionally, its modular design allows users to incorporate up to three units in the same home, achieving a cumulative output.

## ZOOX

### Robotaxi

Zoox developed the first autonomous robotaxi that is road-permitted. The lack of a driver allows for more interior room and a personalized rideshare experience set by the passenger making it a smooth and comfortable ride in spacious cabin.

## Y-BRUSH

### Electric Mouthpiece

The French startup unveiled a toothbrush that requires users to fill the mouthpiece with toothpaste, insert the vibrating device into their mouth, and spend five to ten seconds per jaw for teeth brushing. The electric toothbrush features 35,000 soft nylon bristles on the brush head.

## belkin

### Stand Pro

Belkin has introduced an innovative wireless charging dock that has the ability to pivot and incline, following your movements around a room. The Stand Pro employs motorization to achieve a 360-degree swivel around its base and can tilt up to 90 degrees on the MagSafe arm.

## Beatbot

### Beatbot AquaSense Pro

Beatbot AquaSense Pro is a smart motorized pool-cleaning robot with AI-powered intelligence, 20 sensors, and 2 filters. It takes autonomous robots and makes them aquatic, letting them brush and clean 100% of your pool for 9.5 hours on a 10,000mAh lithium battery.

### AerHT

The Xpeng AeroHT eVTOL Flying Car captures attention with its innovative concept, seamlessly transitioning between driving and aerial modes with foldable propeller arms. While not airborne publicly yet, the AeroHT offers a glimpse into the potential future of flying cars.

## URTOPIA

### Fusion e-bike

The latest bike activates with a smart ring, allowing you to power the bike, play music, and access tech features, including ChatGPT. Communicate directly with ChatGPT through the built-in speaker for tasks like exploring new routes, getting real-time info, and enjoying entertaining conversations..

## Anti Snore Smart Pillow

The pillow functions by recognizing subtle movements associated with snoring. Upon identifying snoring, it takes action by adjusting the loft and repositioning the sleeper's head. The primary goal extends beyond reducing snoring to mitigating the risk of sleep apnea..

## Telly

### Free 55" LCD TV

Telly, a 55-inch LCD TV, is promoted as "free" with a unique cost – users pay with attention instead of cash. Besides standard display features, it includes a built-in soundbar, webcam, and microphone. Notably, it features a 10-inch-tall "Smart Screen" beneath the main panel for advertising content and information.

## Air Taxi

Hyundai has introduced its latest concept for an air taxi, the S-A2, envisioning it as a daily transportation solution for urban areas. It aims to provide a faster point-to-point travel option compared to conventional vehicles like cars or buses dealing with traffic congestion.
